PROFILE

Full Stack Developer and Data Analyst with 5+ years of experience in software and data. I design, build and run production platforms for last-mile logistics, field sales and business intelligence, from Python and PostgreSQL backends to React and React Native clients, ERP integrations and CI/CD. I start every system from the business metric it has to move and measure it in production.

EXPERIENCE

Full Stack Developer, Business Intelligence

Dec 2025 – Present

Auren · FMCG distribution

- Design, build, deploy and operate the BI area's internal platforms on Python, FastAPI, PostgreSQL, React and React Native.
- **RutaLiquidador**, a last-mile delivery and route settlement platform: reduced the order rejection rate **from 7% to 1%** and added real-time GPS control of the truck fleet. 207 API endpoints, 7,700+ automated tests, 43 devices in production.
- Promotion identification engine covering 14 promotion types, **correct in 2,000 of 2,000** validation cases (previous method: about 4% errors). Settlement per crew member in exact decimals, offline-first driver app, fraud signals and WhatsApp alerts.
- Automated WhatsApp reporting for 225 supervisor and category combinations, replacing a manual process.
- Introduced Docker deployments, GitHub Actions CI/CD, mutation testing and scripted releases with backup and rollback (about 15 s of downtime). Cut a critical query from 4.9 s to 7 ms.

Call Center Data Analyst

Feb 2023 – Nov 2024

UBYCALL · Pizza Hut Peru account

- Increased telesales conversion by 15% through KPI and customer behavior analysis.
- Automated 80% of manual reporting with Python and SQL; built Power BI dashboards for management.
- Supervised a team of agents and improved telesales processes based on performance data.

Financial Analyst

Mar 2022 – Dec 2022

Alfin Banco

- Built credit-risk scoring models that reduced default losses by **18%**.
- Developed an automated ETL pipeline processing more than **100,000 transactions a day**, and client dashboards in Power BI.

Administrative Assistant (internship)

May 2021 – Mar 2022

Gestión Inmobiliaria Pacífico

- Restructured internal databases with SQL and built Power BI reports that reduced time spent on administrative tasks.

SELECTED PROJECTS

RutaLiquidador	Delivery, fleet tracking and route settlement platform · FastAPI · PostgreSQL · React · React Native · OSRM · Docker
Ventory Multicanal	Field sales platform with GPS audit and offline sync · FastAPI · PostgreSQL · React Native · React
Capturas de Preventa	Scheduled WhatsApp report bot, about 350 tests · Python · FastAPI · Playwright · Node.js

SKILLS

Backend	Python, FastAPI, SQLAlchemy, Alembic, Pydantic, Node.js, Express, Prisma, REST APIs, JWT
Frontend	TypeScript, React, Next.js, Vite, Tailwind CSS, Leaflet, MapLibre, Recharts
Mobile	React Native, Expo, offline-first sync, encrypted storage, background GPS
Data and BI	PostgreSQL, SQL Server, ETL pipelines, ERP integration, Pandas, scikit-learn, Power BI
DevOps	Docker, Nginx, Linux, GitHub Actions, pytest, Jest, Vitest, Playwright

EDUCATION AND CERTIFICATIONS

Bachelor's in Systems & Computer Engineering	Universidad Privada del Norte (UPN) · in progress
Technical degree in Construction Management	SENCICO
Microsoft Certified: Power BI Data Analyst Associate (PL-300)	Microsoft
Certified ScrumMaster (CSM)	Scrum Alliance
Genesys Cloud certification	Genesys
Python, Data Analysis, SQL and REST APIs	EDTEAM

LANGUAGES

Spanish (native)
